SANFORD[®]
HEALTH PLAN

Understanding your formulary

What is a formulary?

A formulary is a list of prescribed medications chosen by health care providers on Sanford Health Plan's Pharmacy and Therapeutics Committee. Selection criteria includes clinical efficacy, safety, and cost. Medications on this list are approved by the U.S. Food and Drug Administration for use in the United States.

How do I use my formulary?

You and your provider can consult the formulary to help you select the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. If your medication is not listed here, please visit sanfordhealthplan.com, log in to your Member Portal at sanfordhealthplan.com/memberlogin or call the toll-free member phone number on your ID card.

About this formulary

Where differences exist between this formulary and your benefit plan documents, the benefit plan documents rule. This may not be a complete list of medications, and not all medications listed may be covered by your plan. Please look at the benefit plan documents provided by your employer or plan sponsor for full details.

Reading your formulary

The formulary gives you choices so you and your provider can decide your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

Tier information

Tiers are different cost levels you pay for a medication. This is how much you will pay when you fill a prescription. Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Your plan may have multiple or no tiers. Consult your Summary of Benefits and Coverage to determine your cost for each of the tiers listed below.

Drug Tier	Includes	Helpful Tips
Tier 1	\$ Lower-cost generic medications	Use Tier 1 drugs for the lowest out-of-pocket costs.
Tier 2	\$\$ Mid-range cost preferred brand-name	Use Tier 2 drugs instead of Tier 3 to help reduce your out-of-pocket costs.
Tier 3	\$\$\$ Higher-cost non-preferred	Many Tier 3 drugs have lower-cost options in Tier 1 or 2. Ask your doctor if they could work for you.
Tier 4	\$ Generic/Preferred biosimilar specialty medications	Generic and biosimilar specialty medications typically require additional information from you or your provider to determine coverage. Lower cost options may be available.
Tier 5	\$\$\$\$ Mid-range cost preferred brand-name specialty medication	Use tier 5 drugs to help reduce your out-of-pocket costs.
Tier 14	Medical Benefit medications	These are medications dispensed at the pharmacy that are subject to your medical deductible, coinsurance and maximum out-of-pocket.

Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

PA	Prior Authorization – You or your provider must get pre-approval for the medicine with Sanford Health Plan before you can get the prescription filled. NOTE: The Member is ultimately responsible for obtaining pre-approval from the Plan, but your provider may also request approval.
QL	Quantity Limit / Amount Allowed – Medication may be limited to a certain quantity.
SP	Specialty Medication – Medication is designated as specialty. Specialty medications are typically used to treat complex medical conditions. These medications may require frequent dosing adjustments, close monitoring, special training, or compliance assistance. Specialty medications may also need special handling and/or administration, and may have limited or exclusive product availability and distribution.
ST	Step Therapy – Trial of a lower-cost medication(s) is required before a higher-cost medication can be covered.
ACA	Affordable Care Act – As part of the Affordable Care Act, certain drugs are available at a \$0 copay (no member cost-share) if the member meets specific conditions, such as age or gender. If the member does not meet the specific conditions, the usual member benefit will apply.
O	Over-the-counter – Medications, vitamins and/or supplements. Medications that have a rating of “A” or “B” in the current recommendations of the United States Preventive Services Task Force and only when prescribed by a health care Practitioner and/or Provider are available at a \$0 copay (no member cost-share) if the member meets specific conditions, such as age or gender. If the member does not meet the specific conditions, the usual member benefit will apply.
MB	Medical Benefit – Medications covered under the medical benefit that are subject to the medical deductible, coinsurance and maximum out of pocket.
AL	Age Limit – Medication may be subject to a minimum or maximum age.
BP	Brand Penalty - Medication may be subject to penalty because there is a generic alternative or biosimilar equivalent that is available. Penalties do not apply to your deductible or maximum out of pocket.
