

## Coverage for preventive medications

### Learn about copays starting at \$5 or less

Taking preventive medications prescribed by your doctor can help you manage any health conditions you have and avoid serious illness. That's why Sanford Health Plan's pharmacy benefit on high deductible health plans includes special coverage for preventive medications. These medications may include drugs to reduce the risk of blood clots or medications to manage blood sugar.

#### Save on preventive medications

Sanford Health Plan copays start at \$5 or less for certain preventive medications with qualified plans. You could be eligible for a copay at this price or lower if your medication is listed on Sanford Health Plan's Formulary.

#### To see if your medications are eligible:

- Visit [sanfordhealthplan.com](http://sanfordhealthplan.com)
- Select Pharmacy
- Select your formulary
- Search for your medication name in the left-hand column

If your medication is preventive, a PV will be listed in the right column under Limits/Required.

*Please note: Some prescriptions may have other limitations or requirements to qualify for a \$5 copay, such as step therapy or prior authorization.*

Drug Name	Drug Tier	Limits/Required
JANUMET ORAL TABLET 50-1000 MG	2	PV; QL
JANUMET TABLET 50-500 MG ORAL	2	PV; QL
JANUMET XR ORAL TABLET EXTENDED RELEASE 24 HOUR 50-500 MG	2	PV; QL
