

ARE YOU AT RISK FOR TYPE 2 DIABETES?

Know your risk

An estimated 98 million adults aged 18 years and older have prediabetes*. People with prediabetes have blood glucose, or sugar levels, higher than normal. Without acting, many people with prediabetes could develop type 2 diabetes within 5 years**.

National Diabetes Prevention Program

If your score is 5 or higher

You are at increased risk for having prediabetes and are at high risk for type 2 diabetes. However, only your doctor can tell for sure if you have type 2 diabetes or prediabetes, a condition in which blood sugar levels are higher than normal but not high enough yet to be diagnosed as type 2 diabetes.

Talk to your doctor to see if additional testing is needed.
