

# ARE YOU AT RISK FOR TYPE 2 DIABETES?

## Know your risk

More than 84 million Americans have pre-diabetes, but many do not know it. People with pre-diabetes have blood glucose, or sugar, levels higher than normal. While levels are not yet high enough to be diagnosed with type 2 diabetes, people with pre-diabetes are likely to develop the disease within 10 years without intervention.

## National Diabetes Prevention Program

### If your score is 5 or higher

You are at increased risk for having pre-diabetes and are at high risk for type 2 diabetes. However, only your doctor can tell for sure if you have type 2 diabetes or pre-diabetes, a condition in which blood sugar levels are higher than normal but not high enough yet to be diagnosed as type 2 diabetes.

**Talk to your doctor to see if additional testing is needed.**
